Specifications

All specifications subject to change without notice

T.S. Manufacturing Co offers a variety of bin sorting systems customized to suit your application. These systems range from our proven pusher lug and 'J-Bar' sorter systems we're reknown for, to the more custom systems including automatic lumber cart filling and chop line sorting bins, we have the system you need. Each of these designs can be customized with a variety of options including complete UHMW contact surfaces, integrated expandability and remote wireless bin discharge consoles. Our vast System Layout and Project Management allows us to design your system to utilize efficiencies and satisfy a tight budget. There are several variations of design we utilize depending upon the material being processed, piece counts and project size. T.S. installations can be seen in Softwood and Hardwood applications in Sawmills, Planning Mills and Remanufacturing Facilities. With a T.S. Manufacturing Co. Sorter System you are assured of maximum uptime, low maintenance and a solution designed specifically to meet your needs.

Options:

- U.H.M.W. lining on bin baskets, bin walls and soft discharge
- Soft discharge bins
