Board Edgers

1. High Speed Chain Feed Optimized 3 Saw Board Edger

Complete with Grade Edit station. Infeed provides optimum positioning accuracy and feed speed to eliminate board tracking or skewing. Edger comes standard line bored & stress relieved to give prolonged life and maximum accuracy.

2. 3 Saw Board Edger with Live Rolls

Line bored and stress relieved. 6 1/2" opening with 2 shifting saws, driven press rolls and live rollers. Pneumatic lift on press rollers to accommodate larger boards.

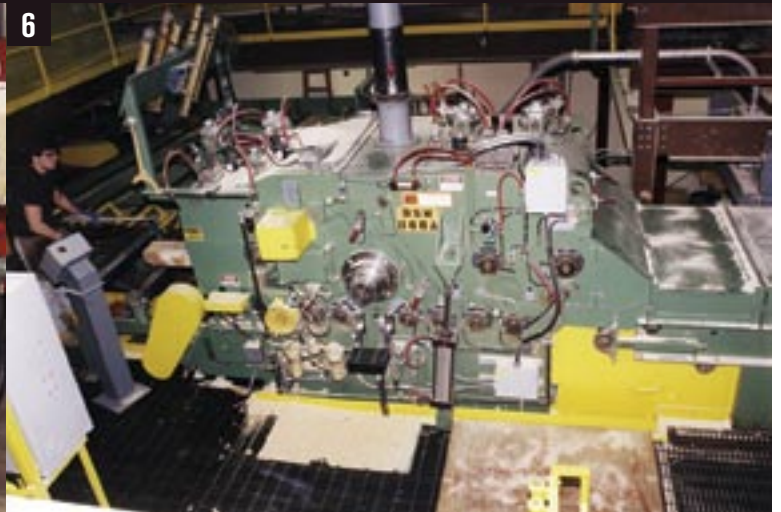

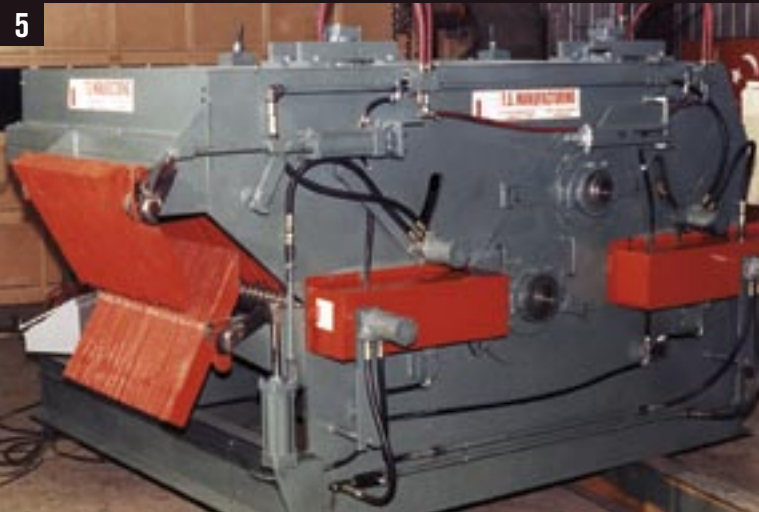

3. 3 Saw Board Edger with Standard Infeed and Shifting Laser Lights

4 1/2" Opening. Gravity press rolls and dead bed rolls.

All edgers are available with shifting methods of: Manual Jog, Linear Positioning, or Stacked Air Cylinder sets.

SOLUTIONS

Gang/Combination Edgers

5. Double Arbor Gang Edger

Minimizes kerf without extra maintenance costs of guides.

6. Top Arbor Clamshell Gang Edger

Clamshell design minimizes maintenance time and is extremely usefull for multiple species gang edging, due to reduction in time required for saw cluster changes.

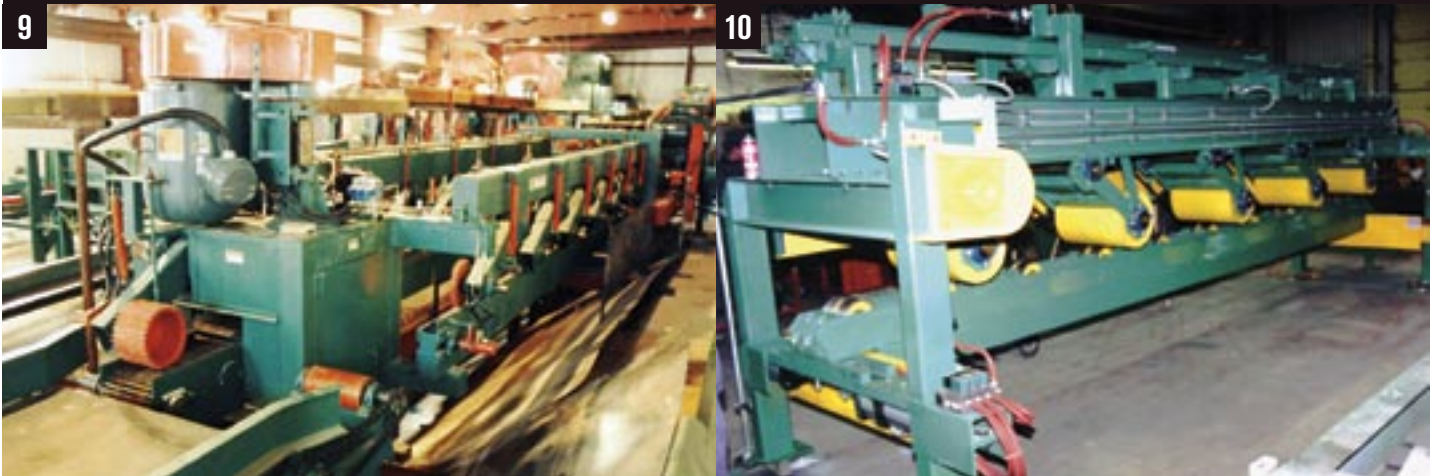

7. Combination Edger

Minimize mill space requirements while maintaining production.

8. Optimized Gang Edger

Maximum production, minimum maintenance. Clamshell design reduces workload for busy maintenance staff.

Tailing Options

9. Horizontal Circular Resaw Outfeed

Recovers boards that would otherwise need to be re-handled at the Resaw or could end up at the chipper.

10. 3 Saw Shifting Tailer

Shifts to allow for Wide boards, while eliminating waste material down the chute

Not Shown

Belt Tailer

- Allows boards and edgings to expediently and economically exit the edger. Allows operator further down processing line to select edgings for resawing that otherwise would have been chipped

Picking Fingers Tailer

- High speed tailing device that shifts in accordance with saws in edger. Works extremely well with optimized edgers. Also allows operator to have fully selectable edgings removal from edger outfeed.

Spiral Roll Tailing with Fence

- Economically removes edgings from 2 saw edgers.
