In today's tight economy, every inch counts.

Whether you're looking for a vertical linebar, horizontal, slant, or multiple saw system, T.S. has the experience and capability to ensure a smooth flowing and low maintenance operation. Every system can be fitted with your choice of our patented Bandmills, available in air strain, or our top of the line High Strain hydraulic system. The wide variety of options in infeed, outfeed, bandsaw and setworks ensures that you will receive a system that is *without compromise*. Also, since our resaw systems are bandmill, not circular oriented; you reduce operator hazards and saw kerf. With a T.S. Manufacturing Resaw System you'll be counting inches of solid wood, not sawdust.

Saw Options:

- Available in Vertical, Horizontal (Photo 6) or Slant Configurations
- Available with T.S. Manufacturing Co. Hydraulic High Strain Bandsaws or T.S. Air Strain Bandsaws (Photo 3).
- Linebar System with either Stacked Pneumatic or Hydraulic Cylinder Setworks or Temposonic Linear Positioning Hydraulic Setworks
- Machined Roll or Slatbed feed surface (Photo 4)
- Available in Single or Close Coupled, Multiple Saw configurations

Feed Saw Options:

- Outfeed Available with Splitter Roll and Fence (Photo 5)
- Infeed Available with Pre-Positioning Linebar with Independent Setworks for longer material and higher production
- Cant turning system available as either punch turners or multi direction chain turners.
- Feed Systems Can be customized to fit specific mill layout requirements and preferences.

Options:

- Multiple Cant Turning Stations
- Automatically Positioning Press Rolls
- Various guide arrangements
- Belt, Rollcase or Chain Transfer Merry - Go Round Systems (Conventional & 'D' Style)
- Operators Cab
- Automatic Saw Guide Positioning System.
- Bandsaw Deviation Detection for Automatic Feed Speed Control Available with Extended Column Bandsaws for Larger Material Requirements
