Drop Saw Trimmer Systems

TS Manufactures a wide range of Drop Saw Trimmer Systems, with a variety of options available in either Motorized Saw or Lineshaft editions that are designed to handle a wide variety of material sizes. This includes the usage of highspeed stacked pneumatic cylinders on each saw and custom chainway spacings to suit the infeed and outfeed requirements of your particular application.

Motorized Saw Trimmers

Our Motorized Saw Trimmer (Photo 5) is available with saws every two feet and can have a saw placed at the negative one foot sawline (Photo 5) as well as positive one foot sawline to allow for greater sawing patterns, nearly matching the versatility of a lineshaft trimmer. T.S. Motorized Saw trimmers are currently operating worldwide with a variety of material specifications and piece counts.

Lineshaft Trimmers

Our Lineshaft trimmers (Photo 4) come complete with a split coupled lineshaft to allow for easy belt changes. Each trim saw has a spare belt storage located beside it to ensure quick changeover times in emergency situations. T.S. lineshaft trimmers are currently operating in high production environments world wide and have earned a reputation for quality and durability with low maintenance requirements.

Double Precision End Trimmers

For applications requiring the utmost in precision end trimming, our Double Precision End Trimmers (Photos 2 & 3) offer very high piece counts with the highest precision currently available. These systems are available in either Motorized Saw or Lineshaft designs with a variety of infeed and outfeed options.

Two Man or 'Canadian Style' Trimmers

These trimmers (Photo 6) are extremely useful in high grade material applications. Their versatility, and the ability to have 2 people make grade decisions on each piece allows for optimum trimming quality, infinite trim solutions, and a low cost investment. The T.S. Two Man trimmer comes in a range of options to allow for individual mill requirements. These include automatic speed control for operations sawing large squares, dust collection guarding, as well as other options.

One Man Trimmers

The T.S. one man trimmer is an ideal choice for mills looking to produce a flexible double end trim solution with a minimal equipment investment. These trimmers operate very similar to a Two Man or 'Canadian Style' trimmer, but operate with a single person to allow for reduced workforce requirements. The result is a very high quality double end trim that your customers and bottom line will appreciate.

Specifications

All specifications subject to change without notice

Each Trimming Solution is custom designed to match your specific requirements, for your assistance these are some highlights of the available options on your T.S. Trimming System

Trimmer Options:

- Pneumatic Dust Control
- Automatic Speed Control
- Clamshell Opening System for easy maintenance
- Stacked Cylinders on Saw Operation for sawing Large Squares

Infeed Options:

- Even Ending Rolls
- Live Fence
- Pneumatic (Photo 1) or Lineal Hydraulic Even End
- Multiple Even Ends with Lift Skids (Photo 7) to allow high piece counts with precision even ending
- Grading Station Operated Trimmers with either grading consoles or Grade Mark Readers (Photo 8)
- Optimized Trimmer Infeed Systems to ensure maximum recovery from every board

Outfeed Options:

- Cut In Two Systems with Automatic Lug Spacing
- Smart Tipples at every foot to allow remanufacturing of offcuts and reduce material waste
- Even Ending or Sorter Centering Rolls
- Automatic Board Marking Systems integrated with Tally System
