

■ Debarker Features

TS Rosser Head Debarkers are designed to be the most rugged, low maintenance and longest lasting systems on the market. With our unique and wide array of options, a TS Debarker can be customized to suit your specific application. Log kicker arms are mounted on shaft with babbitt bearings.

	Model 6-36	Model 8-48
Debarks logs from	6" - 36"	8" - 48"
Debarker head	40 HP	50 HP
Hydraulic system	20 HP	30 HP
Carriage pulled with heavy roller chain	20 HP	30 HP

All of the standard model features above are upgradeable and customizable. Contact a TS salesman for more.

■ Options

- Operator's cab with heating and air conditioning
- Combination debarker / reducer with carriage mounted reducer head or bottom mounted reducer head and overhead hold down wheels
- Hourglass rolls ahead of debarker to get optimum '0' line
- Heavy duty Anson split bearings or bushings
- Turning wheels and kicker arms with locking hubs eliminate troublesome shaft keyways. This strengthens shafts and allows for adjustable wheel spacing for changing log supplies.
- Customized to suit log requirements
- Waste conveyor, bin storage, and truck loading systems are also available
