Specifications

All specifications subject to change without notice

T.S. Manufacturing Co. Stackers are custom designed for each specific application incorporating our over 30 years of lumber handling experience and knowledge. Lumber stackers are available in both Hydraulic and Electric configurations and are able to meet the most demanding of both Hardwood and Softwood applications with unparalleled durability and lowered total cost of ownership.

Each stacker can utilize automatic package width adjustment, featuring instantaneous equipment changeover. This allows operations to alternate between as many different tier sizes and widths as is required, with no adverse effects on production. A T.S. Manufacturing Co Stacker gives unparalleled package presentation with the addition of our automatic tier straightening option.

All of these features can be incorporated with a variety of options including Automatic Sticker Placers (2) that are able to handle a wide variety of sticker material, Box Piling conveyors (3) and Even Ending Rolls (4) or Live Fences to ensure a perfect 'O' line.

Options:

Stud Stacker

Even enders and Live Fences

Box piling

Automatic Air Gapping or Chimney Stacking incorporating a 'Zero Maintenance' design, unlike belt driven systems

Automatic sticker placer (Air or Hydraulic), designed and proven to be able to handle multiple sizes and profiles of stickers effortlessly

Automatic Sticker Placer loading system

End squeeze

Automatic End Waxing Systems

Complete lumber handling systems incorporating package squeeze systems, end waxing systems, wrapping, dunnage handling, etc.

Tally System Interfacing, Package Ticket Printing at Stacker incorporating Automatic Tier Footage Calculation
