

Bulk Material Handling

TS Manufacturing Co.

SOLUTIONS

Printed in Canada Imprimé au Canada

Truss Conveyors

Each conveyor is custom engineered and manufactured to suit your application. TS will Engineer, Detail and Certify Truss conveyor drawings to meet standards.

Belt Conveying

Available in Trough and Flat Slider and Tube Conveyor designs. Adjustable skirting to ensure smooth transition of materials & prolong belt life. Impact sections are custom engineered to suit applications. Optional Hoods keep elements out of materials, while keeping dust in.

TS Vibrating Conveyors

Available in Heavy Duty and Medium Duty designs. Each conveyor is built with a TS Mfg designed positive action eccentric drive that minimizes the effect of load variations. TS Manufacturing also incorporates a special shock absorbing wrist pin that substantially prolongs the life of drive train bearings. TS Vibrating conveyors are engineered and balanced to reduce the requirements of foundations and substructures

Gallery Conveying Systems

TS Manufacturing has designed and manufactured a variety of gallery conveying systems. With installations ranging from 40' to 3000', TS Manufacturing has the capacity to handle even the largest of your conveying requirements.

Pneumatic Conveying

TS Manufactures and Supplies High or Low Pressure systems. Complete or Partial systems can be designed and/or manufactured including Feeders, Blowers, Pipe, Elbows, Cyclones, Valves and Controls.

In-House Engineering

TS Manufacturing utilizes the latest in Computer Assisted Design software that is operated by experienced engineering staff to ensure every piece of equipment exceeds expectations. Our Project Managers oversee projects ranging from equipment consulting to the oversight of the entire lifecycle of complete projects.
